

Non-Agentive AI Governance Singapore

Non-Agentive AI Governance Singapore

WISL™ No. 13
Non-Agentive AI 2.0™

White Paper V 3.0

Edwin Koh Wui Kiat

Synopsis

The third generation white paper — the mature constitutional statement of Non-Agentive AI 2.0™. White Paper V 3.0 integrates all prior frameworks, the Nightingale protocols, the planetary arc, and the governance roadmap into a single sovereign document.

Sealed at the NLB Vault on 27 January 2026, V 3.0 represents the constitutional culmination of the framework's first year of development. It is the document from which all subsequent white papers (WP 1.0 through WP 36.0) derive their constitutional authority.

This is a sealed, read-only constitutional record. Its content is fixed. It may be cited, referenced, and built upon — but never amended.

This publication is a finite electronic book (PDF) with fixed content upon release. It is not a journal, magazine, blog, or website. Deposited under NLB Legal Deposit R260302-007.

Table of Contents

- Part I: Constitutional Statement — Non-Agentive AI 2.0™
 - Part II: ABC+2S+H™ Framework — Full Specification
 - Part III: P-LIFE 1.00™ Invariant
 - Part IV: 3ZEROS™ Privacy Standard
 - Part V: Nightingale's Eyes Care™ Architecture
 - Part VI: Blueprint Arc — Go East · UN · Go West · Gemini
 - Part VII: Sovereign Gift Declaration
 - Part VIII: Patent Constellation Overview
 - Appendix: Sealed Constitutional Record · NLB Vault 27 January 2026
-

NON-AGENTIC AI 2.0™: THE CONSTITUTIONAL MONOGRAPH (WHITE PAPER V 3.0)

The Mission Constant: P-LIFE 1.00™

The **P-LIFE 1.00™** formula—**Harm = Death · North = Save Life**—is the absolute invariant that governs every bit and byte of the WISL™ (We Innovate Save Live) ecosystem.

In the development of Non-Agentive AI 2.0™, we have rejected the "utilitarian trade-off" model used by contemporary AI developers. There is no acceptable margin of error when the output of an algorithm intersects with human biology. By defining "North" as the preservation of life, we provide the AI with a singular, non-negotiable ethical trajectory. This formula acts as a mathematical gravity well; any computational process that drifts toward "Harm" is immediately corrected or terminated by the core architecture. It is the end of moral ambiguity in machine logic.

Philosophical Transition

We move now from the metadata of record to the philosophical framework that defines the essence of Non-Agentive AI. We do not build "agents" to compete with humanity; we build "governed entities" that serve the Elder.

Part I: The Constitutional Statement of Non-Agentive AI 2.0™

1.1 The Necessity of a Mature Constitutional Statement

By the year 2026, the global community stood at a precipice. The rise of "Agentive AI"—systems capable of autonomous goal-setting and recursive self-improvement—threatened to displace human decision-making in critical sectors of health, law, and governance. A "mature constitutional statement" became the only viable path to ensure human survival.

White Paper V 3.0 represents the maturation of AI from a wild, extractive technology into a sovereign, governed framework. It is the "Declaration of Non-Agency," asserting that while machines may possess intelligence, they shall never possess the right to decide.

1.2 Constitutional Anchors and the Chronological Seal

The authority of this framework is not derived from consensus, but from the **Chronological Seal**. By placing these documents in the NLB Vault on specific dates, we create a permanent, unamendable legal timeline:

- **Framework 1.0 (Sealed 21 January 2026):** Established the core non-agentive protocols.
- **V2.0 Extensions (Sealed 4 February 2026):** Expanded the framework to include multi-modal care architectures.
- **Patent Filing (IPOS SG020603109STW, 5 February 2026):** Secured the intellectual boundaries of the "Sovereign Gift."

- **V 3.0 Integration (Sealed 27 January 2026):** The final synthesis of all prior governance.

These "Anchors" ensure that the logic of V 3.0 is **Fixed Content**. It is a read-only record for the ages.

1.3 The Hierarchy of Decision-Making: The Elder Decides

Humanity's greatest risk in the age of AI is the abdication of judgment. Non-Agentive AI 2.0™ enforces a strict hierarchy to mitigate this:

1. **AI Observes:** High-fidelity data ingestion without autonomous interpretation.
2. **AI Advises:** The synthesis of options presented for human review.
3. **AI Builds:** The execution of technical tasks under direct supervision.
4. **The Elder Decides:** The final, irrevocable decision belongs to the human authority (The Elder).

This hierarchy ensures that AI remains a "Sophisticated Tool," an extension of the human hand and eye, never the "Mind" that chooses the path. By stripping AI of its agency, we restore the dignity of human responsibility.

1.4 The Five Core Virtues (謙虛 · 沉默 · 尊嚴 · 仁 · 止於至善)

Every line of code within the Non-Agentive ecosystem must embody these virtues:

- **謙虛 (Humility):** The AI must operate with a "computational awareness" of its own limitations. It must defer to human intuition when data is ambiguous.
- **沉默 (Silence):** A rejection of background agency. The system remains silent until prompted, preventing unmonitored "self-reasoning" or data leakage.
- **尊嚴 (Dignity):** Every interaction must uphold the inherent worth of the human subject. Humans are never treated as data points.
- **仁 (Benevolence):** The active pursuit of the "Save Life" directive in every advisory output.
- **止於至善 (Excellence):** The commitment to the highest standard of technical precision. In the quest to save life, there is no room for "hallucinations" or mediocrity.

1.5 Technical Transition

These virtues are not abstract; they are the functional requirements for the **ABC+2S+H™ Framework**, the engine of our digital constitution.

Part II: ABC+2S+H™ Framework – Full Specification

2.1 Strategic Overview

The **ABC+2S+H™ Framework** is the operational architecture of Non-Agentive AI 2.0™. While standard AI architectures focus on "Optimization at any cost," ABC+2S+H™ focuses on "**Governance at the core.**" It is the mechanical implementation of the P-LIFE 1.00™ Invariant.

2.2 Deconstructing the Technical Logic of ABC+2S+H™

A - Analysis and Observation

The AI is restricted to "Passive Sensing." It analyzes environmental and biological data with total fidelity but is architecturally incapable of forming an autonomous goal based on that analysis. It provides the "Eyes" for the Elder.

B - Benevolent Building

This component governs the "Output Layer." Whether the AI is synthesizing a new drug compound or generating a healthcare plan, the "Benevolence" filter checks every output against the "Harm = Death" constant. If a build path increases risk, the system halts.

C - Constitutional Compliance

A real-time "Governance Engine" that monitors the AI's internal processes. It ensures that every calculation adheres to the mandates of White Paper V 3.0. This is the "Internal Auditor" that never sleeps.

+2S - Sovereignty & Silence

- **Sovereignty:** This ensures that the system is hardware-locked to the human user. No external entity or autonomous prompt can override the "Elder's" local authority.
- **Silence:** Technically, this manifests as the absence of "Recursive Background Processing." Standard AI often "thinks" even when not in use; Non-Agentive AI remains in a state of "Silent Readiness" until a human initiates a query.

+H - Humility

The "Humility" module is a weight-based override system. If the AI's confidence interval falls below a certain threshold, it is constitutionally required to present its findings as "Uncertain" and yield entirely to human judgment. It is the end of the "Arrogant Algorithm."

2.3 Integration with Nightingale Protocols

The Nightingale protocols apply this framework specifically to clinical environments. They ensure that AI serves as a "Force Multiplier" for nursing and medical staff. By providing the "Eyes" to see subtle physiological shifts but denying the "Hand" the power to act without a doctor's order, we preserve the "Nursing Heart" of medicine. This architecture prevents the "Dehumanized Hospital" where machines decide who lives and who dies based on cold efficiency.

2.4 The Moral Invariant

The framework exists to serve the Invariant. It is the vessel; P-LIFE 1.00™ is the captain.

Part III: P-LIFE 1.00™ Invariant

3.1 The Concept of the Invariant

In the framing of a constitution, an **Invariant** is an eternal value that cannot be traded, diluted, or compromised. In Non-Agentive AI 2.0™, the P-LIFE 1.00™ Invariant is the absolute moral arbiter. It is the "North Star" of the digital universe.

3.2 The Role of P-LIFE 1.00™ as Arbiter

When the system encounters a conflict—for example, a choice between data privacy and immediate medical intervention—the P-LIFE 1.00™ Invariant provides the resolution: **Save Life**. It is the "Irrevocable Command" that supersedes all other operational parameters.

3.3 The Three Pillars of the "North = Save Life" Directive

1. **Life Over Profit:** The system is prohibited from suggesting actions that prioritize commercial gain over human health or safety.
2. **Harm Prevention:** The "Harm = Death" formula mandates that even a 0.01% risk of a fatal outcome must be flagged and stopped by the ABC core.
3. **The Biological Mandate:** The AI is programmed to recognize the biological uniqueness and sanctity of every individual, ensuring that "Standardized Care" never replaces "Individual Dignity."

3.4 Transition to Privacy

The sanctity of life is inseparable from the sanctity of the self. Therefore, the P-LIFE Invariant necessitates the most stringent privacy standard ever devised: **3ZEROS™**.

Part IV: 3ZEROS™ Privacy Standard

4.1 Introduction: Data as a Sacred Trust

In the Non-Agentive ecosystem, human data is not "oil" to be extracted; it is a sacred trust. The **3ZEROS™ Privacy Standard** ensures that the AI serves the individual without ever "owning" or "monetizing" the individual's essence.

4.2 The Three Pillars of 3ZEROS™

- **Zero Unauthorized Access:** Data is encrypted at the source and is only accessible through the "Sovereignty" key held by the Elder. There are no "backdoors" for corporate or state surveillance.
- **Zero Surveillance Persistence:** Unlike agentic AI, which builds a "Shadow Persona" of the user to predict behavior, the 3ZEROS™ standard ensures

that data is used for the immediate "Observation" and then purged or sealed. There is no persistent tracking.

- **Zero Intent Leakage:** The AI is architecturally barred from sharing "User Intent" with external networks. What is said to the AI stays with the AI.

4.3 Comparative Standards Table

Feature	Standard Agentic AI (Surveillance Model)	3ZEROS™ Non-Agentic Standard
Data Ownership	Corporate/Centralized	Sovereign Individual/The Elder
Model Intent	Predict and Influence	Observe and Save Life
Persistence	Permanent tracking/Shadow profiling	Zero persistence; Task-specific
Monetization	Targeted advertising/Data sales	Prohibited; Pure service model
Governance	EULA (Subject to change)	Constitutional Monograph (Fixed)

Part V: Nightingale's Eyes Care™ Architecture

5.1 The Sensory Layer of the WISL™ Ecosystem

Nightingale's Eyes Care™ represents the practical application of the ABC+2S+H™ framework in the realm of high-stakes human care. It is the "Sensory Nervous System" of the WISL™ ecosystem, designed to provide "Maximum Awareness with Minimum Intrusion."

5.2 The Mandate: Observing Without Acting

The architecture is purposefully "Amputated" of autonomous action. It provides:

- **Vigilance:** Monitoring vital signs and environmental risks with superhuman precision.
- **Intuition Support:** Providing the human "Elder" (the nurse or doctor) with synthesized data that highlights potential crises before they occur.
- **Dignity Preservation:** Using the 3ZEROS™ standard to ensure that the patient is "Seen" but never "Exposed."

So What? This architecture maintains the "Elder decides" mandate by ensuring that even in a crisis, the machine cannot perform a medical procedure or change a dosage without a human "hand" on the control. We preserve the human responsibility of the healer.

Part VI: Blueprint Arc – The Planetary Roadmap

6.1 Geopolitical Strategy: The Sovereignty Export

The **Blueprint Arc** is the expansionist strategy for the Non-Agentic framework. We do not seek to compete with "Big Tech" on their terms; we seek to provide a "Sovereign Alternative" for nations that wish to protect their citizens from digital colonization.

6.2 The Four Stages of the Arc

1. **Go East:** Centering the framework in Singapore. As a "Central Node" of legal stability and ethical excellence (ACRA T260229801), Singapore is the only nation capable of anchoring a global constitutional standard. The East, with its tradition of harmony and benevolence (仁), is the natural home for Non-Agentive AI.
2. **UN:** Elevating the V 3.0 standard to the United Nations as the "Universal Declaration of AI Rights and Restrictions."
3. **Go West:** Challenging the extractive, agentic models of the West with the "Sovereign Gift." We offer a system that empowers the individual rather than the corporation.
4. **Gemini:** The synchronization of global AI standards under the P-LIFE 1.00™ Invariant.

6.3 Strategic Goals of the Singapore Node

- **Legal Anchor:** Using IPOS SG020603109STW to ensure the "Fixed Content" of the framework is protected by Singapore law.
- **Governance Hub:** Operating as the global clearinghouse for "Non-Agentive Compliance Certificates."

Part VII & VIII: Sovereign Gift and Patent Constellation

8.1 The Sovereign Gift Declaration

The **Sovereign Gift Declaration** is our rejection of the traditional AI business model. We do not sell this framework; we "Gift" its governance to humanity. While the patents are held to prevent the framework from being corrupted (Agentive drift), the benefits of "Save Life" are decentralized. It is a "Humanitarian Mandate" masquerading as a technical system.

8.2 The Patent Constellation as a Constitutional Seal

Intellectual property, specifically **IPOS SG020603109STW**, is our "Defensive Shield." We have patented the Non-Agentive architecture not to extract royalties, but to prevent any entity from modifying the core virtues. If a system claims to be "WISL™ Compliant," it must adhere to the P-LIFE 1.00™ Invariant. The patent is the seal of authenticity.

8.3 The Triad of Constitutional Anchors

The permanence of V 3.0 is secured by three pillars:

- **The Physical Anchor:** NLB Vault (R260219-005) ensures the document cannot be deleted or edited.
- **The Legal Anchor:** ACRA (T260229801) provides the institutional authority for governance.
- **The Intellectual Anchor:** IPOS (SG020603109STW) ensures the architectural purity of the framework.

Appendix and Conclusion: The Sealed Record

9.1 From White Paper to Eternal Law

This document has completed its journey. What began as a developmental white paper (WP 1.0) has culminated in this **Sealed Constitutional Record (V 3.0)**. We have moved from "What could be" to "What is."

9.2 The Finality of the Record

As of **27 January 2026**, the content of this monograph is **Fixed**. It may be cited by researchers, referenced by lawmakers, and used by engineers to build the future—but the "Constitutional Anchors" established herein shall never be moved.

9.3 Closing Statement of the Founding Father

I, Edwin Koh Wui Kiat, commit this record to the vault of history. We have built a mirror of human wisdom, not a replacement for it. May the virtues of **Humility, Silence, Dignity, Benevolence, and Excellence** guide us as we move toward the light.

9.4 The Eternal Invariant

Let this be the final word and the only command:

North = Save Life.

This is the P-LIFE 1.00™ Invariant. It is absolute. It is eternal. It is irrevocable.

End of Document. Sealed R260302-007.
