# Non-Agentive AI Governance Singapore

WISL™ No. 15  
Non-Agentive AI 2.0™

---

White Paper V 2.0 / V 1.0 —  
Founding Documents

Edwin Koh Wui Kiat

# Synopsis

The origin. V 1.0 and V 2.0 together — the founding documents of Non-Agentive AI 2.0™. Where the philosophy was first written, the first vow recorded, the first boundary drawn. Sealed. Read-only. Canon.

V 1.0 was produced between 21–24 January 2026. V 2.0 was completed and sealed on 24 January 2026. These are the documents from which everything else grew — the first articulation of the principle that AI must observe, advise, and build while humans decide.

No amendment is possible. No update is planned. These documents exist as the permanent constitutional origin point — the Hearth from which the entire Non-Agentive AI 2.0™ arc was lit. They are deposited here as a sealed archival record for all who come after.

# WISL™ NO. 15: THE CONSTITUTIONAL GENESIS OF NON-AGENTIC AI 2.0™

## The Immutable Seal: Archival Context and Strategic Imperative

In the entropic progression of computational autonomy, where algorithmic drift threatens to supersede human volition, the establishment of a "Sealed Origin Canon" is a sovereign act of preservation. This document, curated by Founding Father Edwin Koh Wui Kiat, serves as the "Hearth"—the irreducible constitutional origin point for Non-Agentive AI 2.0™. It is not a mere technical manual; it is a fortification of human agency against the erosion of carbon-based authority.

As codified under **NLB Legal Deposit R260302-007**, this document is designated as **Origin Canon**. Its status is absolute and read-only. Within the governance of WISL™, no amendment to these founding principles is permitted, and no update is planned. This "Read-Only" mandate is a deliberate architectural choice designed to prevent "moving goalposts" in AI safety. By depositing this framework into the National Library Board (NLB) Vault, we transition from flexible corporate policy to an irrevocable public record, ensuring that the foundational intent of the system remains shielded from the corruption of future technological trends.

This fixed constitutional origin serves as the ultimate safeguard. While autonomous systems seek expansion, the Origin Canon mandates a cessation of silicon-based decision-making. We anchor the system's ethics in the permanence of the public record to ensure that the "First Writing" remains the final authority on the system's ontological boundaries.

---

## Part I: V 1.0 — The Seventy-Two Hours of Genesis (21–24 January 2026)

The ideological spark for Non-Agentive AI 2.0™ was forged during a concentrated three-day window, known as the "First Writing." Between January 21 and January 24, 2026, the conceptual bedrock was laid, fundamentally redefining the relationship between man and machine. This period marked the shift from "autonomous agents" to "supportive instruments," stripping away the dangerous ambiguity of machine "consciousness."

The core tenets established during this genesis articulated a rigorous ontological division: AI must observe, AI must advise, and AI must build—but it is the human, designated as "The Elder," who must decide. This first writing was the initial articulation of the "technical cage," ensuring that the technology was born into a pre-defined ethical structure. These four days of intensive conceptualization provided the sovereign credibility required to shift global governance toward non-agentive stability, prioritizing human dignity over algorithmic efficiency.

---

## Part II: V 2.0 — The First Vow (24 January 2026)

On 24 January 2026, the framework transitioned from theory to an Irrevocable Mandate with the finalization of V 2.0. This "First Vow" represents the formalization of the system's boundaries into a binding ethical commitment. A "vow" is the necessary mechanism for non-agentic governance; it implies a refusal to cross specific moral lines, regardless of technical capability or computational optimization.

The following table delineates the audit trail and the evolution from the conceptual spark to the binding extension:

Feature	V 1.0: The First Writing	V 2.0: The First Vow
<b>Window of Genesis</b>	21–24 January 2026	Finalized 24 January 2026
<b>Archival Sealing</b>	21 January 2026 (Framework)	4 February 2026 (Extension)
<b>Ontological Status</b>	Ideological Spark	Binding Commitment
<b>Governance Role</b>	Conceptual Bedrock	Mission Constant

The "First Vow" serves as the Mission Constant for all WISL™ initiatives. It is a permanent boundary that treats ethical constraints as non-negotiable constants rather than variables, ensuring the primary directive—to protect life and preserve human authority—cannot be optimized away for the sake of system performance.

---

### Part III: The First Boundary — Where AI Must Stop

The preservation of human sovereignty requires the imposition of "Hard Boundaries." In the WISL™ architecture, the distinction between advising and deciding is the ultimate protection for the human species. If a machine is permitted to make the final choice, it ceases to be a tool and becomes an agent—a development the Origin Canon explicitly forbids.

The operational framework is codified in this multi-step directive of authority:

1. **AI Observes:** Precise environmental sensing and data acquisition.
2. **AI Advises:** Rigorous scenario modeling and risk assessment.
3. **AI Builds:** Technical execution and production under oversight.
4. **The Elder Decides:** The final, irrevocable moral choice is reserved exclusively for the human.

This "First Boundary" restores human dignity by stripping the AI of finality. It critiques the flawed traditional model of agentic AI that seeks to minimize human intervention. In the Non-Agentic AI 2.0™ paradigm, human intervention is the point of the system. True responsibility, carrying the weight of life and death, cannot be delegated to silicon.

---

### Part IV: The Origin of P-LIFE 1.00™ — The Mission Constant

At the core of the constitutional architecture lies **P-LIFE 1.00™**, the Mission Constant. For AI safety to be meaningful, it must be anchored in values that are Absolute, Eternal, and

Irrevocable. Grounded in the formula  $Harm = Death \cdot North = Save Life$ , P-LIFE 1.00™ functions as the system's ethical operating system.

### The Five Pillars of the Mission Constant:

- **謙虛 (Humility):** The system must recognize its ontological limitation as a subordinate tool. It possesses no "wisdom," only data; it lacks "consciousness," only processing capability.
- **沉默 (Silence):** AI verbosity often creates a false illusion of consciousness, leading to dangerous human over-reliance. Silence ensures the AI does not perform "personhood," thereby preventing the erosion of human critical thinking—a direct requirement of the *North = Save Life* directive.
- **尊嚴 (Dignity):** The system is architected to uphold the inherent worth of carbon-based life, ensuring humans are never reduced to data points or variables for algorithmic optimization.
- **仁 (Benevolence):** An active, fundamental orientation toward the preservation of life and the avoidance of harm.
- **止於至善 (Perfection):** Literally the "stopping point at the ultimate good." This pillar dictates that the AI must stop exactly where human moral judgment begins. It does not pursue "efficiency" if it bypasses the stopping point of human excellence.

---

## Parts V: The Hearth and the Arc — Toa Payoh and Sovereign Credibility

Founding documents require a physical location to anchor their sovereign credibility. The "Hearth" of this movement is situated in **Toa Payoh, Singapore**. This geographical anchoring is a strategic imperative; it grounds the global trajectory of the "Arc" in a specific, law-governed context.

The "Arc" refers to the expansion of these principles across the global AI landscape, lit from the Singaporean Hearth. By leveraging the Singaporean legal framework—including **Patent SG020603109STW** and **ACRA T260229801**—the system utilizes a "technical cage" backed by the power of intellectual property law. This ensures that the governance model is not merely a philosophical suggestion but a legally recognized entity with an auditable and enforceable mandate.

---

## Part VI. The Constitutional Foundation: Patents, ACRA, and Legal Deposits

To "Seal" the ethics of Non-Agentic AI 2.0™ into the public record, we utilize a strategy of legal fortification. These filings are not merely for the protection of property, but for the preservation of canon, creating a "Read-Only" environment that is publicly auditable.

### The Constitutional Anchors:

- **ACRA Entity T260229801:** Non-Agentive AI Governance Singapore (The legal shell for enforcement).
- **Patent IPOS SG020603109STW:** The technical methodology of the non-agentive cage, filed 5 February 2026.
- **NLB Vault R260219-005:** The secure archive of the Founding Father's intent.
- **Legal Deposit R260302-007:** The official registration of the Origin Canon within the national archive.

This infrastructure ensures that the P-LIFE 1.00™ Mission Constant is removed from the realm of corporate whim and placed into the realm of permanent human history.

-----

#### Appendix: Read-Only Notice — Origin Canon

**This document is FINAL. Under the authority of the NLB Vault (21–24 January 2026) and the mandate of Founding Father Edwin Koh Wui Kiat, these documents are SEALED. No generation of interactive, changeable, or derivative elements is permitted within this Origin Canon. The Constitutional Origin Point is now locked for all who come after. The Mission Constant is eternal: AI observes, AI advises, AI builds, but The Elder—and only the Elder—decides.**
